

VRA in Short

VRA – Vehicle and Road Automation is a support action funded by the European Union to create a collaboration network of experts and stakeholders working on deployment of automated vehicles and its related infrastructure

Main objectives

Create an active European network of experts on Vehicle and Road Automation and foster cooperation within the Automation WG

Contribute to EU-US-JPN trilateral WG on road vehicle automation (EC – US DoT – MLIT)

VRA-net.eu/wiki

Promote the Research on Vehicle and Road Automation
